Notes on Computer Project #1

Comments about the assignment and responses to frequently asked questions will
be added to this file as necessary.

***** items added on 09/06/18 *****

1. As stated on the assignment handout, you may NOT copy the two files supplied
by the instructor ("project01.data" and "project01.headers") into your account.
Instead, your C shell scripts should refer to the files under the class account
using absolute pathnames.

2. The following are examples of commands which use your C shell scripts:

  proj01.script1 Wayne
  proj01.script2 "Grand Traverse" Gratiot Wexford
  proj01.script3 25 A
  proj01.script4 10 C

3. You will note that some cities appear more than once in the data file.
For example:

  East Lansing city | Clinton | 1969
  East Lansing city | Ingham | 46610

Multiple entries indicate that parts of the city are located in more than one
county. For the purposes of this assignment, you may treat each entry in the
data file as a unique record (you don't need to combine multiple entries for a
given city).
